### About This Game

Who needs backstory? Who needs resource-gathering? Diplomacy is so last year. Gratuitous Space Battles cuts right to the chase of sci-fi strategy games, and deals with large, completely unjustified space battles between huge opposing space fleets. Gratuitous Space Battles combines the visual appeal of an RTS, with the addictive unit-placement and design gameplay from tower defense games. In GSB, the player does not control individual ships at all during battle. The ships fight to a pre-determined set of orders and formations given to them by you before the battles.

GSB casts you as supreme space admiral, tasked with the design of individual spaceships, and the composition of your fleet, as well as general orders of engagement. This is not a twitch-based real time arcade game like many an RTS, but a game of careful thought, planning and big-picture strategy. Huge space battles can be won or lost depending on just how cleverly you balanced the needs of defensive shielding and armor against the expensive punch of laser cannons and plasma torpedoes. GSB also features an innovative multiplayer challenge system. You can upload your ultimate fleet to serve as the enemy to other players, and keep track of how many other players have won and lost against your challenge. That way, you will never run out of cunningly designed enemies to battle against!

- 4 different unlockable player races
- Over 40 different ship hulls
- Over 120 spaceship modules
- Choice of skirmish vs AI, never-ending survival mode or play against other player's fleets with the online challenge

---

system

- Play with different rules as each battle has different spatial anomalies to deal with.

**Check out our [Steam Curator Page](#) and [Website](#) for even reviews and exclusive content!**

[Gratuitous Space Battles is close to its 10th birthday and still holds up great, despite being one of the strangest strategy games i have played, with game-play closer to football management games than traditional RTS. create you units, design and fine tune your deployments, hit fight and.. sit back and do nothing, on the surface this looks tedious, but the truth couldn't be more different, the game is fun, engaging and even though 10 years old still feels fantastic today.](#)

[After revisiting this game for a review, I have decided to go back and complete the campaign once more as its the beans on toast of Pc games, as awesome today as it was in 2009.](#)

[Honestly its a far better game that its successor, and while GSB 2 flopped, it was in no way the fault of the Dev, it was a game/genre of the 00s launching in 2015 and it simply couldn't garner enough non-fans to make it a viable income or to ensure development continued.](#)
